SUMMARY

I recently completed my Bachelor's degree in Computer Science with a specialization in Artificial Intelligence and Machine Learning. I graduated in 2026. Experience in SQL (PostgreSQL), Python, and Excel for data analysis. Built SQL projects involving joins, subqueries, aggregate functions, CASE statements, and data analysis. Seeking an entry-level Data Analyst or SQL Developer role to apply analytical and problem-solving skills.

TECHNICAL SKILLS

- Languages: SQL(PostgreSQL), Python
- Tools: PostgreSQL, Excel
- Areas of Interest: Data Analytics, SQL Developer, Business Analytics
- Basic Knowledge: Power BI

EDUCATION

Vels University — B.Sc. Computer Science, AI & ML Specialization 2023 – 2026
CGPA: 72%

Islamiah Boys Higher Secondary School, Vaniyambadi, Tirupathur 2023
State Board of School Examination, Tamil Nadu

EXPERIENCE

Data & Reporting Associate — Amazon Transport Service, Chennai 2024 – Present

- Compiled and maintained monthly financial and operational reports, ensuring accuracy in data entry
- Tracked team budgets and expense data, flagging discrepancies for review
- Applied structured data-organization practices that carried directly into later SQL/Python analysis work

PROJECTS

Hospital Operations Analysis — PostgreSQL 2026 – Present

- Wrote 40+ SQL queries spanning aggregate functions, GROUP BY/HAVING, date functions, string functions, CASE WHEN logic, joins, and correlated subqueries on a multi-hospital dataset
- Identified top-performing departments, patient-load trends, and expense outliers by department and location
- Ranked doctors by salary within specialization and flagged hospitals with above-average patient counts and expenses

IPL Data Insights & Visualization — Power BI 2026 – Present

- Created a basic interactive Power BI dashboard using IPL dataset.
- Developed charts and filter to analyze team, player and season statistics.

Sales Analytics Dashboard | Python | Pandas | PostgreSQL | Power BI 2026 – Present

- Generated a **5,000-record sales dataset** using Python and cleaned it with Pandas.
- Stored processed data in PostgreSQL and integrated it with Power BI.
- Built an interactive dashboard featuring KPIs (Revenue, Orders, AOV, Customers) and sales analysis.
- Added slicers for dynamic filtering, enabling interactive business analysis.

CERTIFICATIONS

- PostgreSQL — Skill Course
- Python — Inspire Softech Solutions
